Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 28 is rejected under 35 U.S.C. 102(b) as being anticipated by Nakase et al.

Nakase et al. teaches the field of the invention, including a twin overhead cam engine having a cylinder bank inclined to one side of a center plane. Figure 4 shows the crankshaft positioned more to one side of the centerline than the other, therefore defining an axis on the side of the centerline opposite the head, camshaft axes and valves.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3617

4. Claims 20,21 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakase et al. in view of Isaka.

Nakase et al. fails to disclose more intake passages than exhaust passages, as is considered to have been old and well known in the art.

Isaka teaches a five valve head, in which there are provided three intake valves and passages, and two exhaust valves and passages.

It would have been obvious to one of ordinary skill in the art at the time of the invention to provide three intake valves and passages and two exhaust valves and passages to the head of Nakase et al. as taught by Isaka.

Such a combination would have been desirable at the time of the invention was made so as to provide for improved charging efficiency.

5. Claims 1,2,4-19 and 22-27 are allowed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ed Swinehart whose telephone number is 703-308-2566. The examiner can normally be reached on Monday through Thursday 6:30 am to 2:00 pm..

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel Morano can be reached on 703-308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
